ITL313-18 (SIA 2 LAB)
Final Term Lab Activities and Mini Project

Project Overview
This project would involve several key components, each using Python libraries:

1. **GUI (Graphical User Interface)**
Tkinter
PyQt/PySide

2. **Login System (user authentication)**

a. SQLite for User Data Storage: A small database used for storing usernames and hashed passwords.

b. Password Hashing: Python's built-in hashlib to securely hash and salt passwords before storing them. Never store plain-text passwords.

c. Logic: The GUI would have input fields for the username and password. On login, the script would check the entered username against the database and verify the password using the stored hash.

3. Choose only one function for your mini project from the options below:

a. Media and Entertainment
b. Utilities
c. Social Media

MEDIA AND ENTERTAINMENT FEATURES

1. Movies and TV Shows
2. Music and Audio
3. Video Games

UTILITIES FEATURES

1. URL Shortening
2. SMS and Messaging
3. Fake Data Generation

SOCIAL MEDIA FEATURES

1. Reddit
2. X (formerly Twitter)
3. Instagram

**** The group can include from minimum of 1 member to maximum of 3 members.***

**** Checking of mini project progress/status every week starting on Week 11 (October 20, 2025 onwards).***
